

## Notes

I thought a children's book would be perfect as a portrayal of the creepiness of the uncanny valley, especially because of the classic innocence associated with children's books. When a children's book strays from the norm, our brains tend to be very sensitive to what it says or shows. This makes the scary elements of the story stand out more and makes them more fascinating to the reader. The uncanny valley is monstrous, but put in something that is made to appeal to the innocence of humans, it is even more monstrous.
