

ROBOTS IMPERSONATED MY PARENTS

Beware the scare!

You could be next

Are all of
our family
members
not real??

Roger, 16, claims that Sunday morning he came downstairs to find that his parents were not who they normally seemed. "I swore it was them, but they were a little bit off, something wasn't human." Roger warns civilians of the development of new robotics and the risk of hyper intelligence.

"When I started feeling afraid, they didn't like it. They're gonna try to become the new humans!"

"We have no idea what they are capable of, my son couldn't tell who I was anymore after that thing broke in!" says Sarah, 35.
